100 HERALDS OF SPRING

At an early date, while snows still fly, these little bulbs will burst into bloom, reminding us that Spring is near.

They should be planted on arrival in the fall, 2 to 3 inches deep and 3 inches apart, in places where they can remain undisturbed for a number of years.

CROCUS—One of the great delights of Spring.

ERANTHIS (Winter Aconite)—Produces little yellow flowers like Buttercups about 3 inches above the ground about 2 weeks before the Crocus are in bloom.

IRIS RETICULATA—A small form of Dutch Iris. Perfectly hardy. March blooming. As fragrant as Violets.

MUSCARI (Grape Hyacinths)—Deep cobalt — blue flowers producing miniature spikes resembling the Hyacinth.

SNOWDROPS—Very early white flowers.
